- AI
- CI/CD - Jenkins
- Agile / Scrum

PROFILE

Throughout my career as a developer with over four years of experience, I contributed to updating and developing Lund University Frontend, working together with a UX Designer and a small team.
The last year, I worked with a complex project in a bigger team that included developers and designers, which increased my programming skills and my passion for continuous learning and staying up to date with modern technologies. Because of that I started learning Backend development. This allows me to be more hands-on in helping the team strive for success and deliver effective solutions.

EDUCATION HISTORY

Frontend Developer

Sep 2019 – May 2021

EC Utbildning - Higher Vocational Education (HVE)

The Electrical Engineering and Energy Program

Aug 2016 - Jun 2019

NTI High School

WORK EXPERIENCE

Software Developer, Sektionen IT (Lund University)

Jan 2022 - Present

- Migrated old Bootstrap to latest stable version and updated JavaScript code to use modern JS for Lund University page.
- Upgrading the University's Drupal website to the latest version and keeping the Drupal website and modules up to date.
- I worked in a bigger team with the complex project, where I was a part of implementing a new Frontend design, also helped with updating the code and worked with backend development using PHP and MongoDB.

Frontend developer, Exakta Software (Sentro) - Internship
Sep 2020 - Nov 2020 + March 2021 – May 2021

- Built a Frontend form page using Vue.js.
- Contributed to rebuilding a swimming club website with WordPress.
